

Name (Frontend/Backend)	Endpoint	Method	Purpose
Add Category (FE)	/33279500/add-category	Angular Component	Load the add category component
Add Category (BE)	/33279500/api/v1/add-category	HTTP POST	Create and insert new category into the database
List Category (FE)	/33279500/event-categories	Angular Component	Load the list category component
List Category (BE)	/33279500/api/v1/event-categories	HTTP GET	Retrieve categories from the database
Delete Category (FE)	/33279500/delete-category	Angular Component	Load the delete category component
Delete Category (BE)	/33279500/api/v1/delete-category	HTTP DELETE	Delete the category from the database
Update Category (FE)	/33279500/update-category	Angular Component	Load the update category component
Update Category (BE)	/33279500api/v1/update-category	HTTP PUT	Update the category inside the component
Category Details (FE)	/33279500/category/:id	Angular Component	Load the details of the category with the given id
Statistics G1 (FE)	/33279500/stats-g1	Angular Component	Load the statistics of the number of categories and events present
Statistics G1 (BE)	/33279500/api/v1/get-status	HTTP GET	Retrieve the number of categories and events inside the database
Text to speech (FE & BE)	/33279500/text-to-speech	Angular Component, Socket	Outputs an mp3 file of the text
Add Event (FE)	/YantaoHe/add-event	Angular Component	Load the add event component
Add Event (BE)	/YantaoHe/api/v1/add-event	HTTP POST	Create and insert new event into the database
List Events (FE)	/YantaoHe/list-events	Angular Component	Load the list event component
List Events (BE)	/YantaoHe/api/v1/list-events	HTTP GET	Retrieve events from the database

Delete Event (FE)	/YantaoHe/delete-event	Angular Component	Load the delete event component
Delete Event (BE)	/YantaoHe/api/v1/delete-event	HTTP DELETE	Delete the event from the database
Update Event (FE)	/YantaoHe/update-events	Angular Component	Load the update event component
Update Event (BE)	/YantaoHe/api/v1/update-event	HTTP PUT	Update the event in the database
Statistics G2 (FE)	/YantaoHe/stats-events	Angular Component	Load the statistics of the number of categories and events present
Statistics G2 (BE)	/YantaoHe/get-status	HTTP GET	Retrieve the number of categories and events inside the database
Event Details (FE)	/YantaoHe/event-details/:eventId	Angular Component	Load the details of the event with the given eventId
Translate (FE & BE)	/YantaoHe/translate	Angular Component, Socket	Displays the translation of the text input
Invalid Data Error (FE)	/invalid-data-error	Angular Component	Loads the invalid data component when invalid data is given
First Page (FE)	/index	Angular Component	Loads the index component for the starting page
